SUMMARY

Computer Science undergraduate with experience in full-stack development and database-driven applications. Experienced in building REST APIs, implementing authentication, and developing web applications using React and Flask. Familiar with testing, deployment, and working with PostgreSQL. Interested in building practical and scalable software solutions.

EDUCATION

Muthoot Institute of Technology and Science

BTech in Computer Science and Engineering – CGPA: 9.14

Kochi, Kerala

Sep 2023 – June 2027

MGM Higher Secondary School

Class XII – 99.08%

Class X – 98%

Wayanad, Kerala

2020 – 2022

2019 – 2020

EXPERIENCE

Software Intern – Innovature Software Labs

Jan 2026 – Present

- Built full-stack web apps using React, Flask, and PostgreSQL — including REST APIs with JWT auth, OTP-based 2FA, role-based access control, pagination, and filtering
- Implemented media handling (multi-image upload, validation, thumbnail generation) and ORM relationships with SQLAlchemy.
- Wrote unit/integration tests (pytest, Postman) and deployed to Render with production DB and environment configuration

PROJECTS

AI-Based Disaster Relief Coordination System

- Developed a machine learning model to classify disaster risk using rainfall, elevation, and historical data.
- Implemented backend logic, API integration, and frontend-backend integration for prediction workflow.
- Tech Stack: Python, Flask, HTML, CSS, Scikit-learn, Pandas

Crop Yield Prediction Using Machine Learning

- Built a Random Forest model for crop yield prediction using district-wise crop and season data.
- Performed preprocessing, feature engineering, and deployed the model using FastAPI ($R^2 = 0.96$).
- Tech Stack: Python, FastAPI, Scikit-learn, Pandas, Matplotlib

ShopSphere – Full-Stack E-Commerce Platform

- Built a complete e-commerce platform with product listings, category filters, search, pagination, shopping cart, and Redux-based state management.
- Backend: Flask REST API with JWT auth, role-based permissions, multi-image upload with thumbnail generation, and PostgreSQL.
- Frontend: React with Axios integration, protected routes, admin dashboard for product management, and image upload with preview.
- Tech Stack: React, Redux, Flask, PostgreSQL, SQLAlchemy, Pytest, Postman, Render

CERTIFICATIONS

- NPTEL – Problem Solving Through Programming in C (Jul 2024 – Oct 2024, Score: 54%)
- Cambridge – Linguaskill Business (B2 Level, Sep 2023 – Jan 2024)
- Infosys Springboard – Programming Fundamentals using Python (Jun 2025)
- NPTEL – Python for Data Science (Jan 2026 – Apr 2026, Score: 77%)

TECHNICAL SKILLS

- Languages: Python, C, JavaScript
- Frontend: React, HTML, CSS
- Backend: Flask, FastAPI, REST APIs
- Databases: PostgreSQL, SQLite, SQL
- Testing & Tools: Pytest, Postman, Git, VS Code
- Libraries: NumPy, Pandas, Scikit-learn
